 - index.html: Created index page for future collaborative edits (13 years ago)
 - styles.css: Create styles.css and updated README (13 years ago)
- README content:

Well hello there!

This repository is meant to provide an example for *forking* a repository on GitHub.

Creating a *fork* is producing a personal copy of someone else's project. Forks act as a sort of bridge between the original repository and your personal copy. You can submit *Pull Requests* to help make other people's projects better
